

The vision for TDP is to allow grantees to easily submit accurate data and be confident that they have fulfilled their reporting requirements. This reduces the burden on all users, improves data quality, inform better policy and programs, and ultimately helps low-income families.

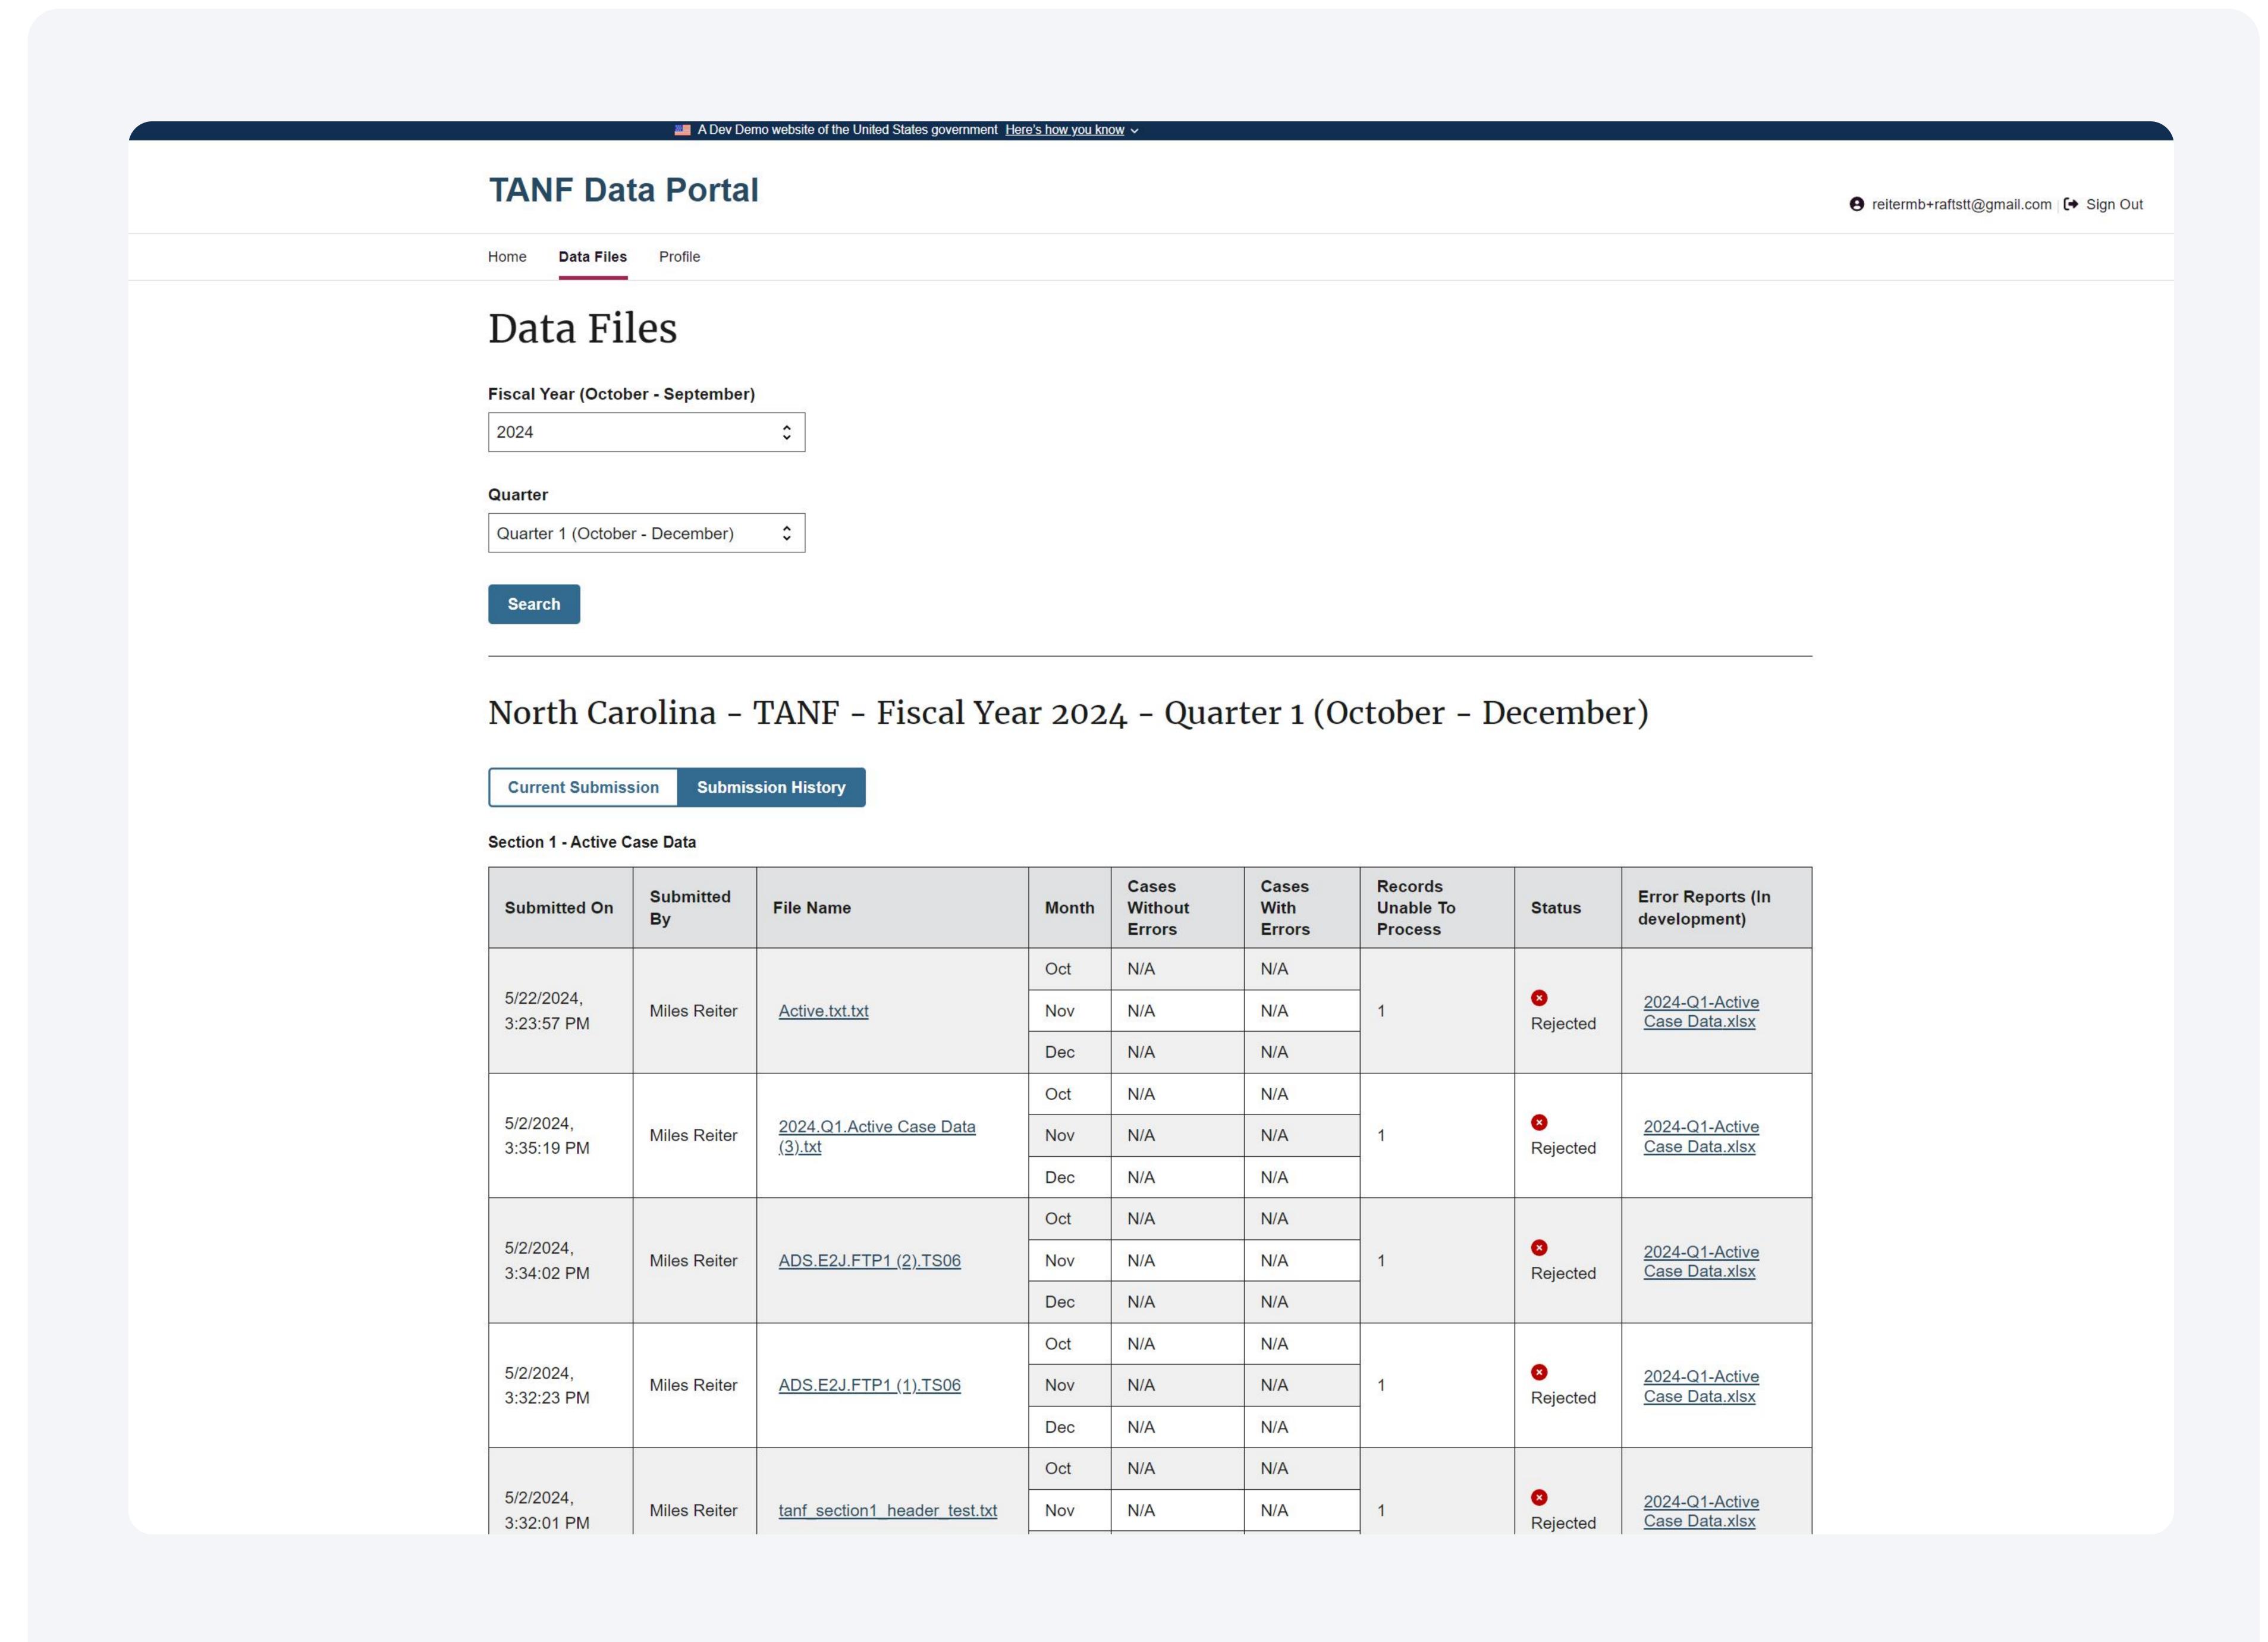

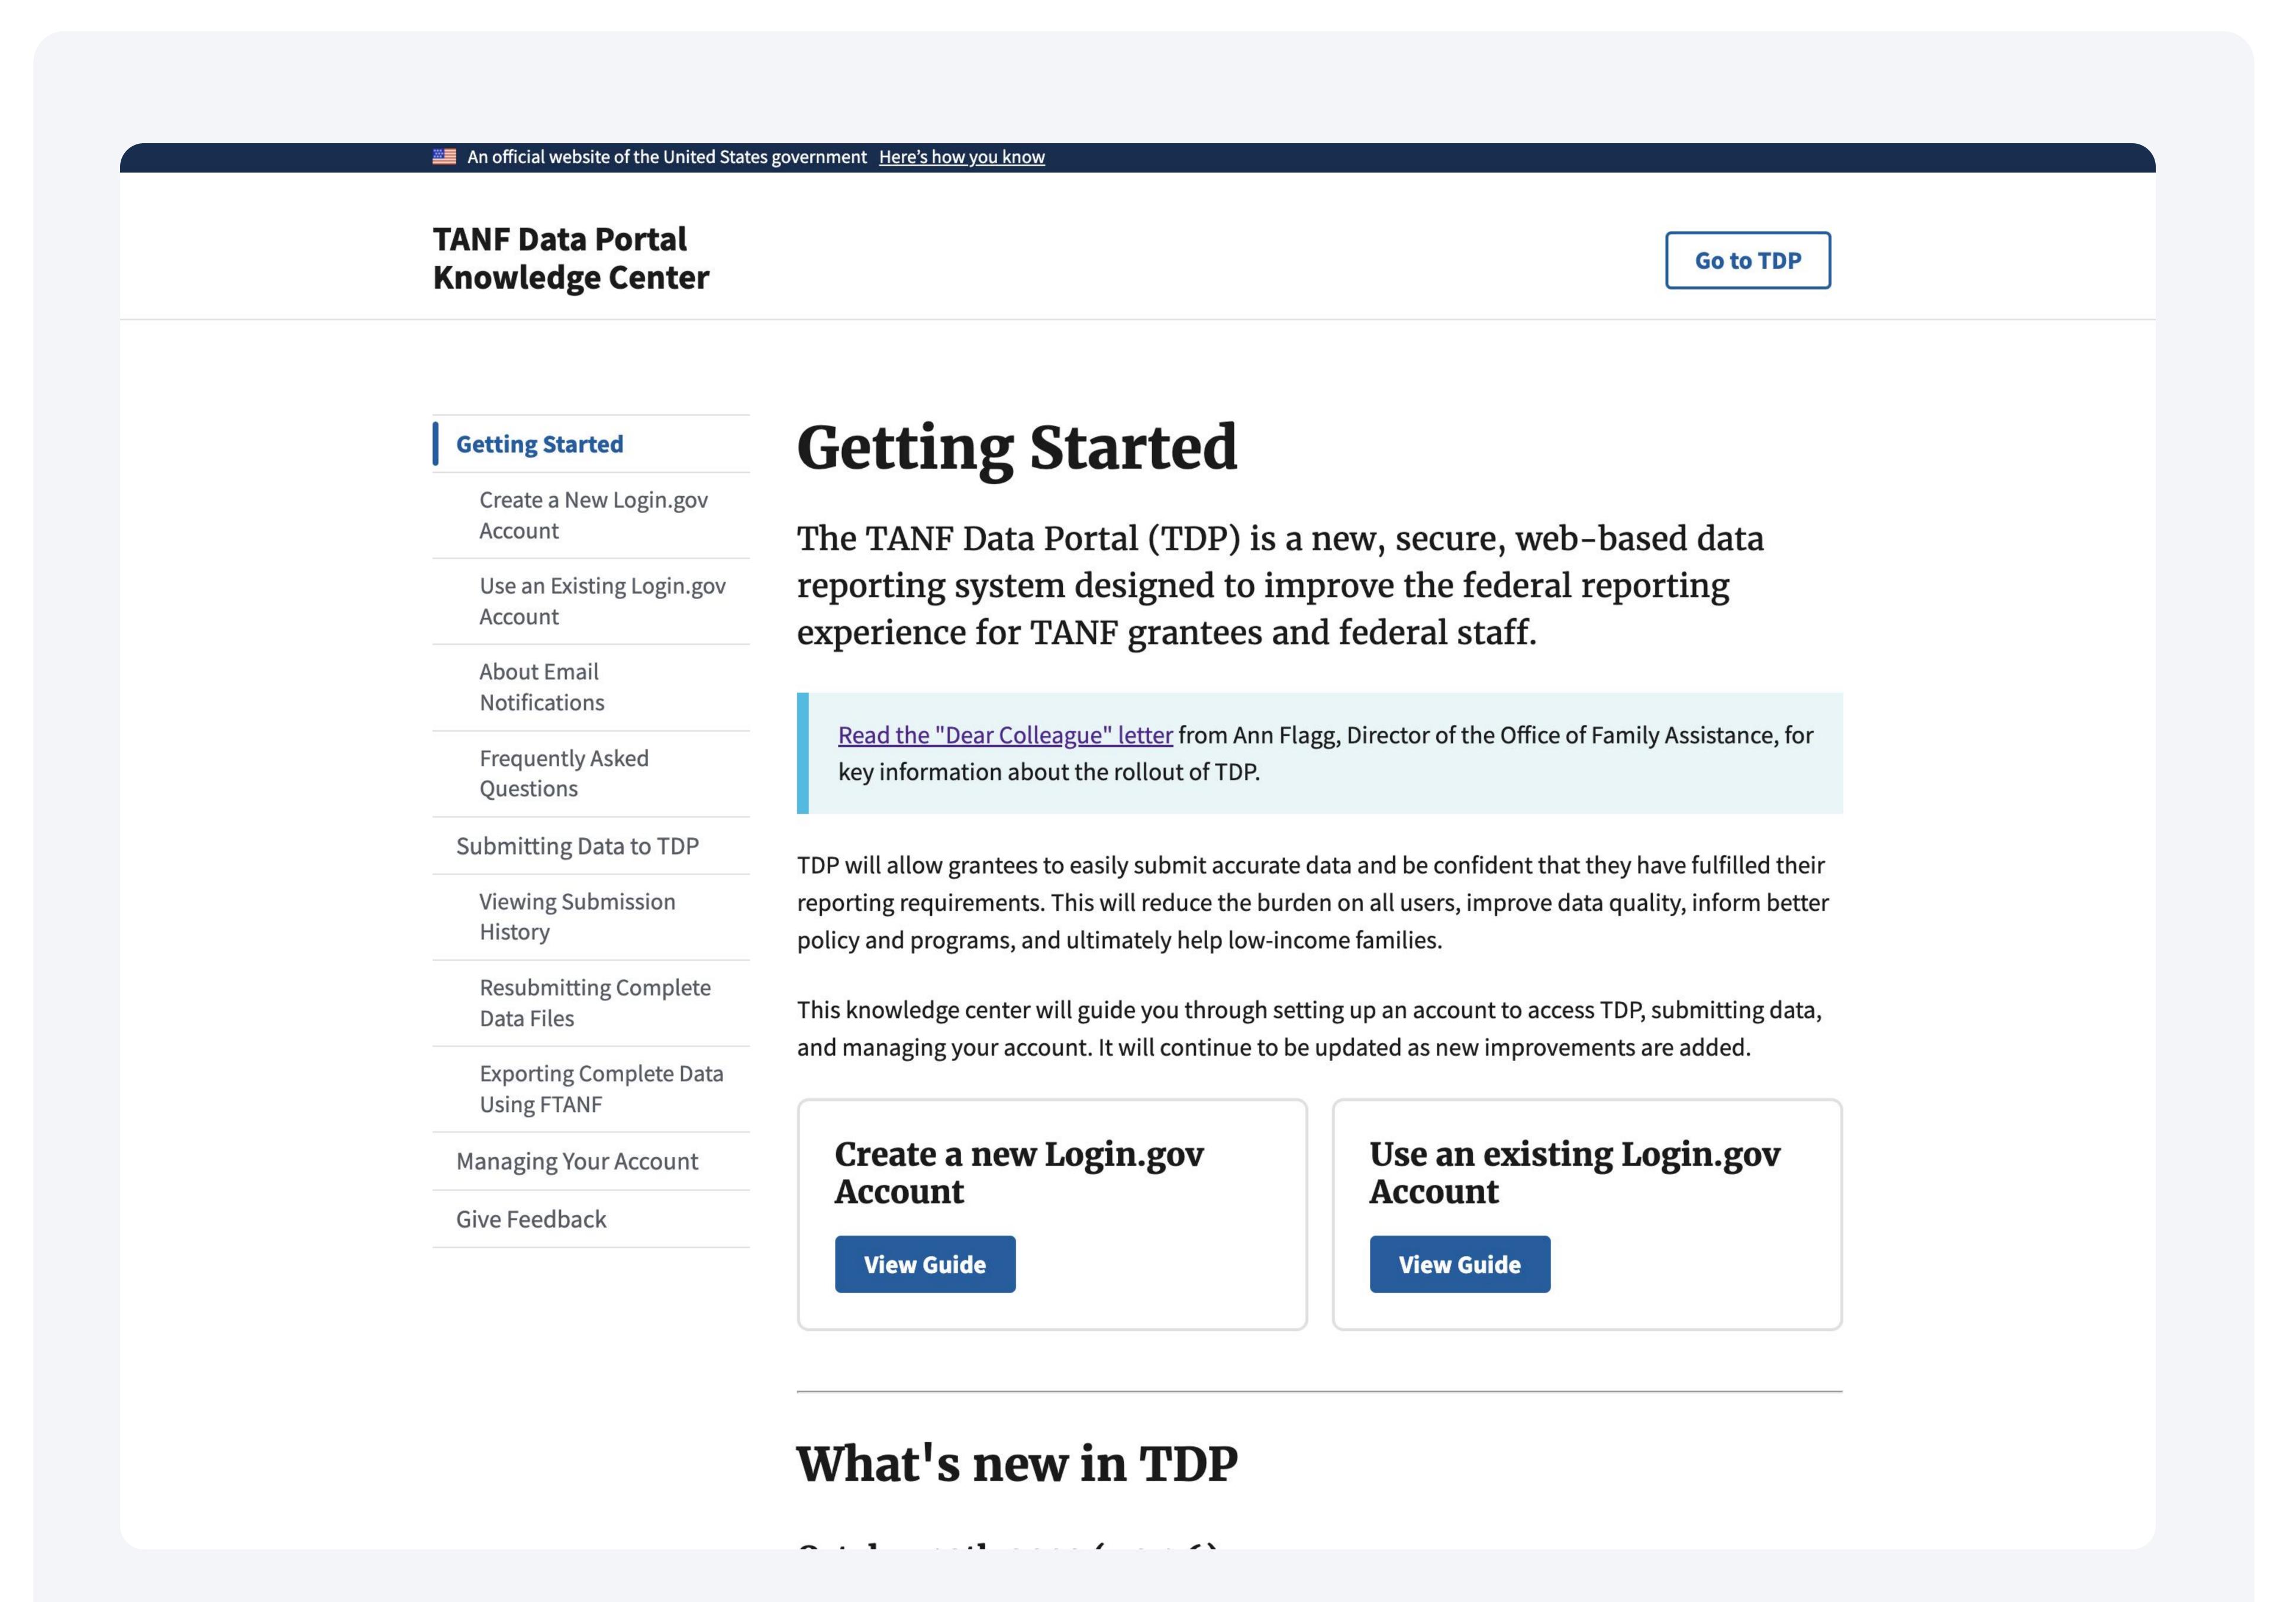

The **TANF Data Portal** (TDP) is a new, secure, web-based data reporting system designed to improve the federal reporting experience for TANF grantees and federal staff.

Once your request for access is approved by an OFA admin, your account will have access to the 'Data Files' page where you'll be able to submit your quarterly transmission files.

Submission History allows you to access all versions of data files previously submitted for a given quarter via the TANF Data Portal (TDP).

The **TDP Knowledge Center** contains resources on all things TDP from account creation to data submission.
